**Ermis** is a customer-centric driver school management software application. Its design is based on more than a decade of software development in large projects in west Europe on behalf of multinational organization aiming in serving several millions of customers. Our aim was to use this experience and build an ergonomic and user-friendly application, while considering the known budgetary restrictions of small companies like driving schools.

**Ermis** gives you the necessary overview of all activities undertaken by yourself, your staff, your customers and your vehicles. It provides you with a mechanism to register, analyze and print all stationary data along with dynamic data (i.e. lessons, maintenance activities, payments).

Further on, we encourage you to think of your own design and your own specific needs and mention them to us. If we believe that they can be beneficial to all our target customers (US and Europe) we will gladly incorporate them in your purchased version charging you only the shipping costs.

We advice you also to complement your purchase with our annual maintenance agreement as this will give access to our technical service. We will try to solve all your technical issues in real time. For urgent matters we would ask you to give us access on your machine so we can be more effective.

Our application is offered with more than ten reports like:

- a. Computerization and management of staff members
- b. Computerization and management of teachers
- c. Computerization and management of students
- d. Computerization and management of vehicles
- e. Computerization and management of payments

We understand there may be a need for additional reports. We encourage you to mention them to us. We can agree on a small premium to bundle them into your application.

Do not hesitate to contact us to arrange a web-presentation. We would be happy to show you the benefits of working with **Ermis**.

Our application is also available in German and Greek language. You can take advantage of our international exposure and indirectly get ideas from your colleagues inland as well as

abroad, as to how they manage their business. Further on, you may have your own ideas which you would like to incorporate into **Ermis**. In this case, please don't hesitate to communicate them to us. We would want to consider them in our future releases.

Prices (excl. VAT):

<b>EPMHΣ professional</b>	200 €	Ideal for single PC clients. Should be sufficient for 90% of the driving schools. You can migrate to the corporate edition any time.
<b>Annual Maintenance Agreement</b>	100 €	Technical support of our application. In critical cases we can directly access your computer.
<b>EPMHΣ corporate</b>	500 €	Ideal for more than one PCs sharing the same database. We assume networking is already in place.
<b>Annual Maintenance Agreement</b>	200 €	Technical support of our application. In critical cases we can directly access your computer.

The screenshot displays the ERMIS software interface. At the top, there is a navigation bar with tabs for 'Driving School', 'Customers', 'Teachers', 'Accounting', 'Vehicles', 'Activities', 'Administration', and 'Reports and Statistics'. Below this is a table listing customer records. The selected record (ID 3202) is shown in a detailed form below the table. The form includes fields for ID, Role, Service, Status, Firstname, Lastname, Father's name, Mother's name, Ph.Home, Ph.Mobile, Fax, Reg.Date, Nationality, Birthdate, and Email. There are also checkboxes for 'No Phone', 'No Email', and 'No Post'. At the bottom of the form, there are buttons for 'Refresh', 'Delete', 'New', and 'Save', along with an 'About' button.
